

TABLE OF CONTENTS

Section 1: Vector Biology and Ecology

Host Plant Preference and Natural Infectivity of Insect Vectors of <i>Xylella fastidiosa</i> on Common Weeds and Crop Plants	
Kent Daane	3
Exploration for Biological Control Agents in the Native Range of the Glassy-winged Sharpshooter	
John Goolsby	7
Determining the Day-Degree Requirements for Glassy-winged Sharpshooter Development and Quantification of Demographic Statistics at Five Temperatures	
Mark Hoddle	10
Expressed Sequence Tags from the Black-winged Sharpshooter: Application to Biology and Vector Control	
Wayne B. Hunter	12
Genomic Sequencing, Discovery, and Characterization of Viral Pathogens in the Glassy-winged Sharpshooter	
Wayne B. Hunter	17
Microarray Analysis of Gene Expression and Diapause in the Glassy-winged Sharpshooter	
Wayne B. Hunter	22
Protein Identities from <i>Graphocephala atropunctata</i> Expressed Sequence Tags: Expanding Leafhopper Vector Biology	
Wayne B. Hunter	25
Spatial Population Dynamics and Overwintering Biology of the Glassy-winged Sharpshooter in California's San Joaquin Valley	
Marshall Johnson, Kent Daane, Russell Groves, and Elaine Backus.....	30
Assessing the Post-Winter Threat of Glassy-winged Sharpshooter Populations	
Marshall Johnson, Kris Lynn-Patterson, Mark Sisterson, and Russell Groves	34
Dispersal and Movement of the Glassy-winged Sharpshooter and Associated Natural Enemies in a Continuous, Deficit-Irrigated Agricultural Landscape	
Rodrigo Krugner, Russell L. Groves, Marshall W. Johnson, Hannah Nadel, James Hagler, and Drake C. Stenger	38
Cold Storage of the Adult Stage of <i>Gonatocerus ashmeadi</i>: The Impact on Maternal and Progeny Quality	
Roger A. Leopold	42
Xylem Specialists Colonizing Texas Vineyards: Abundance and Distribution Studied Through Generalized Additive Models	
Forrest Mitchell and Isabelle Lauzière	47
Improved Detection, Monitoring, and Management of the Glassy-winged Sharpshooter	
Russell F. Mizell, III and Peter C. Andersen	50
Seasonal Transmission of <i>Xylella fastidiosa</i> by the Glassy-winged Sharpshooter from Grapevines Infected for Various Lengths of Time	
Thomas M. Perring	54

Identifying the Species of Mymaridae Reared in Argentina and Mexico for Potential Introduction to California Against the Glassy-winged Sharpshooter and Preparing and Submitting for Publication a Pictorial Annotated Key to the <i>Ater</i>-Group Species of <i>Gonatocerus</i> – Egg Parasitoids of the Proconiine Sharpshooters in the Neotropical Region	58
Serguei V. Triapitsyn.....	
Survey of Leafhoppers on Grapes in the Piedmont and Mountain Regions of North Carolina	62
Raul Villanueva, Turner Sutton, and George Kennedy.....	
Section 2: Vector Management	
Importation of Parasitoids of <i>Homalodisca</i> and Other Proconiini Genera from Northwestern Mexico for Biological Control of the Glassy-winged Sharpshooter	67
Julio Bernal, Agustin Fú Castillo, and Roman Rakitov	
Evaluation of the Impact of Neonicotinoid Insecticides on the Glassy-winged Sharpshooter and Its Egg Parasitoids	70
Frank J. Byrne	
Progress on Resolving the <i>Gonatocerus tuberculifemur</i> Complex: Neither COI nor ITS2 Sequence Data Alone Can Discriminate All the Species Within the Complex, Whereas ISSR-PCR DNA Fingerprinting Can	73
Jesse H. de León, Guillermo A. Logarzo, and Serguei V. Triapitsyn	
Development of Molecular Markers Toward Glassy-winged Sharpshooter (GWSS) Egg Parasitoids to Aid in Both Identifying Key Predators of the GWSS Egg Stage and in Taxonomic Identifications	77
Jesse H. de León, James R. Hagler, and Marshall Johnson.....	
Evaluation of Molecular Markers for Discriminating <i>Gonatocerus morrilli</i>: A Biological Control Agent Imported from the Origin of the Glassy-winged Sharpshooter	81
Jesse H. de León and David J.W. Morgan	
RNA-Interference and Control of the Glassy-winged Sharpshooter and Other Leafhopper Vectors of Pierce's Disease	86
Bryce W. Falk, Mysore R. Sudarshana, and Michael Parrella	
Should Neoclassical Biological Control Agents from Argentina Be Released in California for Control of the Glassy-winged Sharpshooter?	90
Mark Hoddle and Nic Irvin.....	
The <i>Anagrus epos</i> Complex: A Likely Source of Effective Classical Biological Agents for Glassy-winged Sharpshooter Control	94
Joseph Morse and Richard Stouthamer	
Laboratory and Field Evaluations of Neonicotinoid Insecticides Against the Glassy-winged Sharpshooter	98
Nick C. Toscano, Frank J. Byrne, and Ed Weber	
Riverside County Glassy-winged Sharpshooter Area-Wide Management Program in the Coachella and Temecula Valleys	101
Nick C. Toscano and Carmen Gispert.....	

**Section 3:
Pathogen Biology and Ecology**

Biology of the <i>Xylella fastidiosa</i>-Vector Interface	
Rodrigo Almeida	107
Evolution of <i>Xylella fastidiosa</i> Avirulence	
Rodrigo Almeida	111
Modeling Sharpshooter Transmission of <i>Xylella fastidiosa</i>	
Rodrigo Almeida	112
Feeding Behaviors of the Glassy-winged Sharpshooter That Control Inoculation of <i>Xylella fastidiosa</i>	
Elaine Backus	116
Beta-1,4 Glucanase in Glassy-winged Sharpshooter Saliva and Its Possible Role in Infection and Movement of <i>Xylella fastidiosa</i>	
Elaine A. Backus and John M. Labavitch.....	120
The Roles That Different Pili Classes in <i>Xylella fastidiosa</i> Play in Colonization of Grapevines and Pierce's Disease Pathogenesis: Chemosensory Cluster Controlling Twitching Motility	
Thomas J. Burr and Harvey C. Hoch.....	123
Seasonal Behavior of <i>Xylella fastidiosa</i> Causing Almond Leaf Scorch Disease Under Field Conditions and Detection of the Bacteria by Means of Array-PCR	
Jianchi Chen	127
Characterization of Regulatory Pathways in <i>Xylella fastidiosa</i>: Genes and Phenotypes Controlled by GacA	
Donald A. Cooksey.....	130
Understanding Control of <i>Xylella fastidiosa</i> Cell Aggregation: Importance in Colonization and Biofilm Development in Grapevine and Sharpshooter Foregut	
Harvey C. Hoch and Thomas J. Burr	135
The Role of Type V Secretion Autotransporters in the Virulence of <i>Xylella fastidiosa</i>	
Michelle M. Igo	140
Hierarchical Analysis and Diversity Studies of <i>Xylella fastidiosa</i> Populations in California by Multi-Locus Simple Sequence Repeat Markers	
Hong Lin.....	144
Assessment of the Process of Movement of <i>Xylella fastidiosa</i> within Susceptible and Resistant Grape Varieties	
Steve Lindow	148
Management of Pierce's Disease of Grape by Interfering with Cell-Cell Communication in <i>Xylella fastidiosa</i>	
Steve Lindow	152
Initial Genetic Analysis of <i>Xylella fastidiosa</i> in Texas	
Lisa D. Morano and Blake R. Bextine.....	158
Plasmid Addiction as a Novel Approach to Develop a Stable Plasmid Vector for <i>Xylella fastidiosa</i>	
Glenn M. Young and Michele Igo	162

Abstract Only

The Iron Stimulon of <i>Xylella fastidiosa</i> Includes Genes for Type IV Pilus and Colicin V-Like Bacteriocins	
Paulo A. Zaini and Aline Maria de Silva	165

Section 4: Pathogen and Disease Management

An Analysis of C-Di-GMP Signaling in <i>Xylella fastidiosa</i> Virulence	
David Appel and Paul de Figueiredo	169
Exploiting <i>Xylella fastidiosa</i> Proteins for Pierce's Disease Control	
George Bruening and Edwin Civerolo	173
Grape Rootstock Variety Influence on Pierce's Disease Symptoms in Chardonnay	
Peter Cousins and John Goolsby.....	177
Effects of <i>Xylella fastidiosa</i> Group, Almond Cultivar, and Climate on the Establishment and Persistence of Infections Causing Almond Leaf Scorch	
Kent Daane	179
Evaluation of Signal Sequences for the Delivery of Transgene Products into the Xylem of Grapevine	
Abhaya M. Dandekar.....	183
Ground Vegetation Surveys to Determine Reservoir Hosts of <i>Xylella fastidiosa</i> in North Carolina	
Leah E. Floyd and Turner B. Sutton	187
Role of Type I Secretion in Pierce's Disease	
Dean W. Gabriel	190
Manipulation of Endophytic Bacteria for Symbiotic Control of <i>Xylella fastidiosa</i>, Causal Agent of Citrus Variegated Chlorosis	
Cláudia Santos Gai, Paulo Teixeira Lacava, Welington Luiz Araújo, and João Lucio Azevedo	194
Environmentally Created Immunity Against Pierce's Disease	
David Harshman, Arinder K. Arora, and Thomas A. Miller.....	198
Seasonal Appearance of <i>Xylella</i> in Vineyards and Control of Pierce's Disease in Southern California	
Barry L. Hill and Thomas A. Miller.....	200
Biological Control of Pierce's Disease of Grapevine with Benign Strains of <i>Xylella fastidiosa</i> Subsp. <i>piercei</i>	
Donald L. Hopkins.....	202
Evaluation of Grapevine Endophytic Bacteria for Control of Pierce's Disease	
Bruce Kirkpatrick.....	203
Identification of Mechanisms Mediating Cold Therapy of <i>Xylella fastidiosa</i> Infected Grapevines	
Bruce Kirkpatrick.....	208
Inhibition of <i>Xylella fastidiosa</i> Polygalacturonase to Produce Pierce's Disease Resistant Grapevines	
Bruce Kirkpatrick.....	212
Isolation, Characterization, and Genetic Manipulation of <i>Xylella fastidiosa</i> Hemagglutinin Genes	
Bruce Kirkpatrick and Michele Igo.....	214

Native Secretion Systems for the Grapevine Endophyte <i>Pantoea agglomerans</i> Useful for the Delivery of Anti-<i>Xylella</i> Effector Proteins	
David Lampe	218
Examination of Glassy-winged Sharpshooter Entry Points of a High-Risk Vineyard in the Temecula Valley	
Thomas A. Miller.....	221
Finding Pierce's Disease Infected Vines in Large Vineyards: A Proposed Pierce's Disease Sampling Program	
Thomas M. Perring	225

Abstract Only

Assays of Texas Vineyard Soils for Effects on Pierce's Disease of Grape	
Mark C. Black and James S. Kamas	228

Section 5: Crop Biology and Disease Epidemiology

Role of Alfalfa in the Epidemiology of <i>Xylella fastidiosa</i> in California	
Rodrigo Almeida	231
Significance of Riparian Plants in the Epidemiology of Pierce's Disease	
Kendra Baumgartner.....	235
Enabling Technologies for Grape Transformation	
Alan B. Bennett	239
Support for the Management of Intellectual Property within the Pierce's Disease Research Initiative and Research Community	
Alan B. Bennett	243
Functional Testing and Characterization of Pierce's Disease Induced Promoters from Grape	
David Gilchrist, Douglas Cook, and James Lincoln	247
Resistance to Pierce's Disease by Transgenic Expression of Plant-Derived Anti-Apoptotic Genes	
David Gilchrist and James Lincoln.....	252
The Pit Membrane Barrier to <i>Xylella fastidiosa</i> Movement in Grapevines: Biochemical and Physiological Analysis	
John Labavitch.....	256
Microarray Analysis of Global Gene Expression of <i>Vitis vinifera</i> in Response to <i>Xylella fastidiosa</i> Infection	
Hong Lin.....	261
Endophytic Bacterial Populations in Grapevines Resistant to Pierce's Disease of Grapevine	
Thomas A. Miller and Jennifer Parker.....	265
<i>Xylella fastidiosa</i> Transmission by Glassy-winged Sharpshooters and Smoketree Sharpshooters from Alternate Hosts to Grapevines	
Thomas M. Perring	268

Breeding Pierce's Disease Resistant Table and Raisin Grapes and the Development of Markers for Additional Sources of Resistance	
David W. Ramming and Andrew Walker	271
Mechanisms of Pierce's Disease Transmission in Grapevines: The Xylem Pathways and Movement of <i>Xylella fastidiosa</i>. Comparison of the Xylem Structure of Susceptible/Tolerant Grapevines and Alternate Plant Hosts	
Thomas L. Rost and Mark A. Matthews	274
Assessing the Potential of Forage Alfalfa Crops to Serve as <i>Xylella fastidiosa</i> Primary Inoculum Sources in the San Joaquin Valley	
Mark Sisterson, Russell Groves, Kent Daane, and Shyamala Thammiraju.....	279
Map-Based Identification and Positional Cloning of <i>Xylella fastidiosa</i> Resistance Genes from Known Sources of Pierce's Disease Resistance in Grape	
Andrew Walker and Summaira Riaz.....	281
Breeding Pierce's Disease Resistant Winegrapes	
Andrew Walker and Alan Tenscher	286
<u>Abstract Only</u>	
<i>In Vitro</i> Study of the Effects of Grape Xylem Saps and Cell-Wall Constituents on Growth and Virulence-Related Gene Expression of <i>Xylella fastidiosa</i>	
Davis Chen and Hong Lin.....	291
AUTHOR INDEX	293
